

Omnicanne Group Environmental Policy

In living up to our vision and mission, Omnicanne strives to profoundly research, develop and operate to meet the needs of today without compromising those of the future. We consciously develop our collective eco-consciousness by promoting cleaner production and making judicious use of natural resources at our disposal for the benefit of all.

We are motivated towards implementing the 'zero waste' concept in our operations by embracing design for environment strategies, pollution prevention and resource recovery when and where applicable.

In line with our commitment towards the environment, we shall strive as far as is reasonably possible to adhere to this policy in all aspects and at all stages of our business operations.

As such, we shall:

- Strive to comply with all environmental legislations, regulations and other requirements relevant to our activities, products and services
- Be committed to continual improvement for the reduction and prevention of pollution from our activities
- Develop and uphold the culture of Reduce, Reuse and Recycle within all our operations
- Promote environmental awareness amongst our employees through continuous education and training
- Communicate this policy to all our employees and ensure that it is made available to our stakeholders as and when required
