

OMNICANE MILLING OPERATIONS LIMITED – RAW HOUSE  
ENERGY POLICY

Omnicanne Milling Operations Limited owns and operates a leading and modern raw sugar mill in Mauritius with a crushing capacity of 8,500 tons of sugar cane daily. We firmly believe in preserving natural resources by adopting business model based on an integrated and 'zero-waste' approach.

This Energy Policy is an integral part of the strategy of Omnicanne Milling Operations Limited to achieve our organization's vision, which is to be an inspiration for sustainable development. Top management of Omnicanne Milling Operations Limited commits itself to achieve Energy Performance Management through establishing, implementing, maintaining, and improving an Energy Management System by complying with the Energy Management Systems Requirements based on ISO 50001:2018.

Our primary goal is to follow a systematic approach to ensure that our Energy Policy is appropriate to the nature and scale of energy use at Omnicanne Milling Operations Limited. To achieve continual improvement of energy performance, including energy efficiency, energy use and consumption, the following goals are pursued:

- To promote a culture of continual improvement in energy management
- To ensure the availability of information and provide necessary resources to achieve objectives and targets
- To ensure compliance with applicable legal and other requirements related to energy use, consumption and efficiency
- To support the purchase of energy efficient products and services and design for energy performance
- To communicate our energy policy at all levels within Omnicanne Milling Operations Limited
- To provide reliable and transparent information on energy consumption to our interested parties

As and when required, we shall identify, establish, review and update our energy policy, energy objectives and measurable targets where everyone within our organisation can contribute to achieving our goals.
