48.59%
46.79% - 31 Dec 2023

Net Asset Value Per Share

MUR 84.73
Rs 84.09 - 31 Dec 2023

Highlights for the quarter ended 31 March 2024

Agro-Industry

Due to the seasonality of the cane and milling activities, principally costs were accounted for during the quarter. EBITDA for the segment decreased by Rs 56 M due to adjustments relating to crop 2022 in respect of the sugar price and the refined service fee which were accounted in the 2023 quarter.

Energy

The segment posted lower EBITDA of Rs 15 M following higher repairs and maintenance costs incurred in this quarter. The effect of these were partly offset by the better results of the Omnihydro power plant in Rwanda.

Properties

During the quarter, the property segment posted an improved EBITDA of Rs 16 M.

The sale of land plots in the Greenview Morcellement and the Business Park projects were the main drivers behind this performance. The Omnicane House building which is the main investment property asset of the Group also contributed positively to this result.

Retail & Brands

The segment's EBITDA rose by Rs 9 M and was principally due to an improved occupancy and average room rates of the Holiday Inn hotel. In respect of the Dina line of products, no major change was noted.

Corporate & Financial Services

This newly created segment generated an EBITDA of Rs 6 M driven by the treasury activities and corporate services.

Forex Loss

During the quarter, forex loss of Rs 46 M which arose upon the revaluation of the Omnihydro USD loan was accounted under other comprehensive income as the Group applied cash flow hedge accounting. Last year, the forex loss pertaining to the same loan revaluation was accounted through income statement.

Outlook

Agro-Industry

Sugar cane and refined sugar production are expected to be at the same level as last year.

However, the market conditions which prevailed during the last two years could be less favourable in 2024 and might put some pressure on the sugar price.

Energy Segment

The power plants are planned to perform within the parameters of their respective PPA both in Mauritius and Rwanda.

With the recent decrease in coal prices, the import loans balances are expected to decrease during the year thereby reducing finance costs.

Properties, Retail & Brands Segment

There has been good progress towards certification of the antioxidant products and identification of potential customers in the targeted markets. For the development of the rum brand, we have earmarked strategic partners to accompany us in this new venture.

On the property side, apart from the sale completion of the Greenview morcellement and the Business Park, the team is working on other potential property projects in the region.

Corporate and Financial Services

This new pole of the Group is well positioned to grow outside the present captive market. The treasury arm of the pole is currently in advanced discussions with strategic partners to grow its activities.
